CAREER OBJECTIVE

I want to specialize particularly in developing web-based applications and producing user-focused solutions in the field of software development. I have a solid foundation in programming languages such as C++, Java, and Python. At the same time, I have gained experience in data management by working with databases like MySQL and SQLite. I am a software developer candidate who is team-oriented, open to learning, and has strong analytical thinking skills. My goal is to continuously improve myself in the software world and take part in creative and sustainable projects.

EDUCATION

Doğuş University – Software Engineering (4th Year)

2022 – Present

GPA: 2.85 / 4.00

CERTIFICATES & COURSES

GOIT Fullstack Developer Course – Completed (08.08.2025)

- Frontend: HTML, CSS, JavaScript, React, Redux Toolkit, Responsive Design
- Backend: Node.js, Express.js, REST API, Authentication & Authorization
- Extras: TypeScript, Git, Docker, Swagger/OpenAPI, Career & Soft Skills

TECHNICAL SKILLS

- Programming Languages: C++, Java, Python
- Databases: MySQL, SQLite, MS SQL
- Tools: MATLAB, Visual Studio, Visual Studio Code, SSMS, Git

INTERNSHIP & WORK EXPERIENCE

Software Intern — İdeal Çözüm Software Technologies Ltd. – Istanbul

Aug 05, 2025 – Sep 01, 2025

- Developed an Inventory/Stock Tracking System project from scratch to manage a business's stock and inventory processes.
- Built a structure supporting product, category and brand management with listing, search and filtering capabilities.
- Developed backend APIs and the database infrastructure using .NET Core and MS SQL.
- Built the user interfaces with React and MUI and connected them to the backend services.
- Managed version control via GitHub and prepared the project documentation.

Software Intern — X-ETC. – Istanbul

Jul 06, 2026 – Aug 03, 2026

- Took part in a team developing a Personnel Management System for HR processes.
- Contributed to personnel, leave, overtime, expense, advance, custody, recruitment, authorization and company settings modules.
- Developed services, APIs and business rules on the backend using .NET Core, Entity Framework and MS SQL.
- Built new interfaces and improved existing modules on the frontend using React.
- Took part in Docker configuration, GitHub version control, and resolving technical issues.

Systems Administration Intern — Aktek Bilgi İletişim Teknoloji San. ve Tic. A.Ş. (Akkök Holding) – Istanbul

Aug 10, 2026 – Sep 04, 2026

- Contributed to the management of corporate computers, user accounts and servers as part of the Systems Administration team at Aktek Bilişim, under Akkök Holding.
- Installed required software on new computers, named devices according to the corporate naming standard, and joined them to the domain.
- Took part in creating user accounts, authorization, and applying corporate security measures.
- Built a desktop application (YazılımKurulumAracı) that lets employees install the full set of standard company software in a single run instead of one by one.
- Monitored the regular operation of systems and helped resolve technical issues faced by users.
